Biology – Ph.D. learning Goals

Learning Goal 1:
Deepen student knowledge and understanding in a specific area of biology.

Learning Goal 2:
Expand student knowledge of research based approaches in biology.

Learning Goal 3:
Develop high level laboratory and library based research skills

Learning Goal 4:
Empower students to perform experimentation and expand our understanding of basic and applied knowledge in biology

Learning Goal 5:
Provide students with the knowledge and skills to pursue high level careers in academia, government or private industry
