

1. PROGRAM 2 INSTRUCTIONS, CS101, PROF. LOFTIN

Write a Java program to convert an integer number of seconds into hours, minutes, and seconds.

Your program should prompt the user to enter the number of seconds, and then print out the conversion. For example,

```
Enter number of seconds: 9733
9733s = 2h 42m 13s
```

Your program file should be entitled `Program2.java` and should be turned in through the Blackboard system. BE SURE YOU USE THE CORRECT CASE IN THE IDENTIFIER `Program2.java`. Click on the Tools button on your left, and click on the Digital Dropbox. Your program must compile and run on the `pegasus` server. Programs which do not compile will not be graded.
