

DIANA FROST SHELSTAD

Born Diana Louise Frost,
August 19, 1947; Sydney, NSW, Australia
Australian citizen, U.S. Permanent resident
Married, 1 child

B.A. (Hons) University of Tasmania, 1967
M.Sc. Monash University (thesis submitted June 1969)
Ph.D. Yale University, 1974
(Thesis: Some character relations for real reductive algebraic groups. Advisor: R. Langlands)

Assistant to R. Langlands, Institute for Advanced Study, 1973 – 1974
Assistant, Institute for Advanced Study and
Assistant Professor, Haverford College, 1974 – 1975
Ritt Assistant Professor, Columbia University, 1975 – 1980
Associate Professor, Rutgers University (New Brunswick), 1980 – 1981
Associate Professor, Rutgers University (Newark), 1981 – 1985
Professor, University of Utah, 1985 – 1989
Professor II, Rutgers University (Newark), 1988 –

Visiting : University of Dijon, February 1980
Institute for Advanced Study, Member: 1982 – 1983,
Spring 1994, Spring 2001
University of Paris VII, Spring 1987
Harvard University, Spring 1992

Characters and inner forms of a quasi-split group over \mathbf{R} ,
Compositio Math., 39 (1979), 11 – 45.

Orbital integrals and a family of groups attached to a real reductive group, *Annales Scient. Ec. Norm. Sup.*, 12 (1979), 1 – 31.

Orbital integrals for $GL_2(\mathbf{R})$, *Proc. Sympos. Pure Math.*, XXXIII, part 1, Amer. Math. Soc. (1979), 107 – 110.

Notes on L-indistinguishability (based on a lecture of R. P. Langlands), *Proc. Sympos. Pure Math.*, XXXIII, part 2, Amer. Math. Soc. (1979), 193 – 203.

Base change and a matching theorem for real groups, in *Noncommutative Harmonic Analysis and Lie Groups*, Springer Lecture Notes 880 (1981), 425 – 282.

Embeddings of L-groups, *Canad. J. Math.*, 33 (1981), 513 – 558.

L-indistinguishability for real groups, *Math. Annalen*, 259 (1982), 385 – 430.

Orbital integrals, endoscopic groups and L-indistinguishability for real groups, in *Journées Automorphes*, Publ. Math. Univ. Paris VII, 15 (1983), 135 – 219.

Endoscopic groups and base change \mathbf{C}/\mathbf{R} , *Pacific J. Math.*, 110 (1984), 397 – 415.

(With R. Langlands) On principal values on p-adic manifolds, in *Lie Group Representations II*, Springer Lecture Notes 1041 (1984), 250 – 279.

(With R. Langlands) On the definition of transfer factors, *Math. Annalen*, 278 (1987), 219 – 271.

A formula for regular unipotent germs, in *Orbites Unipotentes et Représentations II*, Astérisque 171, 172 (1989), 275 – 277.

(With R. Langlands) Orbital integrals on forms of $SL(3)$, II, *Canad. J. Math.*, XLI (1989), 480 – 507.

(With R. Langlands) Descent for transfer factors, in *The Grothendieck Festschrift II*, Birkhauser (1991), 485 – 563.

Transfer and descent: some recent results, in *Harmonic Analysis on Reductive Groups*, Birkhauser (1991), 297 – 304.

(With R. Kottwitz) *Foundations of Twisted Endoscopy* Astérisque 255, Math. Soc. France, 1999.

Basic endoscopic groups, *Compositio Math.*, 120 (2000) 317 – 325 (appendix to “Poles of intertwining operators via endoscopy” by F. Shahidi).

Tempered endoscopy for real groups, I: geometric transfer with canonical factors, in *Representation Theory of Real Reductive Groups*, Contemporary Math., 472 (2008), 215 – 246.

Tempered endoscopy for real groups, III: inversion of transfer and L-packet structure, *Journal of Representation Theory*, 12 (2008), 369 – 402.

Tempered endoscopy for real groups, II: spectral transfer factors, in 自守形式与 Langlands 纲领 (*Automorphic Forms and the Langlands Program*), Higher Education Press (China), 2009, and International Press (US), 2010, 236 – 276.

On geometric transfer in real twisted endoscopy, *Annals of Math.*, [to appear](#), 53pp.
